MEDIA ADVISORY

Communications & Power Industries LLC – TMD Technologies Division

27 April 2022

CPI TMD secures multimillion-dollar defence contract

The TMD Technologies Division of Communications & Power Industries (CPI) has been awarded a multimillion-dollar contract for the supply of compact MPMs (Microwave Power Modules) to be used in an airborne, military, data link application. CPI TMD Technologies Division is a world-class supplier of advanced microwave and radio frequency (RF) products.

Said Nigel Hann, Sales Director for CPI TMD, “This order has resulted from CPI TMD Technologies Division’s close relationship with the customer, over a long period of time. We have a reputation with this customer for working hard to meet their specific requirements, and we are delighted to be awarded this new business in recognition of those efforts.”

“Additionally, we have developed this product to meet the needs of military communications customers around the world. The MPM operates in Ku-band, making it suitable for data link applications worldwide. With other major orders in the pipeline, CPI TMD looks forward to further expanding customer base for these products in the months ahead,” continued Hann.

About Communications & Power Industries

Communications & Power Industries (CPI) is a global manufacturer of electronic components and subsystems focused primarily on communications and defense markets. With a heritage of technological excellence that spans decades, CPI develops, manufactures, and globally distributes innovative and reliable technology solutions used in the generation, amplification, transmission, and reception of microwave signals for commercial and military applications. Learn more about CPI at www.cpii.com.

CPI TMD Technologies Division – leaders in scientific and technical microwave and RF innovation

CPI TMD's headquarters design and manufacturing facility in West London, UK.

With a heritage dating back to the 1940s, CPI TMD Technologies is a world-class designer and manufacturer of professional microwave and RF products. At the division headquarters in Hayes, West London it produces specialized transmitters, amplifiers, microwave power modules (MPMs), high voltage power supplies, microwave tubes and transponders for radar, electronic warfare (EW), and communications applications. A previous twice Queen's Award winner, it also produces a range of advanced instrumentation microwave amplifiers for EMC testing, scientific and medical applications.

CPI TMD Technologies is also making ongoing and substantial investment in the development of quantum-enabled technology under the UK National Quantum Technologies Programme (UK-NQTP).

CPI TMD Technologies has also expanded its investment in the Solid-State Power Amplifier MPM space through a partnership with Diamond Microwave LTD, and now has SSPA MPMs available with various output power options from UHF through Ku band.
